

HEDGTRADE

Decision-support • scenario & risk intelligence

Pilot SOW (Typical)

A 4■week pilot to validate workflow fit and outputs.

Weeks 1–2: configuration

- Universe selection and constraints
- Scenario templates aligned to your process
- Exposure attribution setup and reporting format

Weeks 3–4: cadence & validation

- Weekly brief delivery + review session(s)
- Refine decision points and boundaries
- Define success criteria and engagement scope

Deliverables

- Sample weekly brief format + configured views
- Scenario framework and decision boundary definitions
- Controls alignment (Now / Next) for your deployment
