Decision-support • scenario & risk intelligence

Security & Controls (Overview)

Controls summary with scope-based roadmap.

Now
- TLS for web traffic
- Authenticated access (login gated)
- Decision-support only (no execution, no custody)

Next (scope-based)
- Role-based access controls
- Audit trail enhancements for scenarios and briefs
- SSO / SAML and single-tenant deployments

Vendor support
- Security questionnaire response available on request
- Controls can be aligned to your internal requirements
